**Subject:** Kansas DOT New Products

Pete,

Thank you for sending the information on Pro-ring Manhole Adjustment Ring, for review by Kansas Department of Transportation's (KDOT) Approved Products Committee. We have reviewed the preliminary information form and product information. At this time KDOT does not have a present need for this product, KDOT does not prequalify this product. **Our contractors are allowed to use your type of product at their discretion with the Engineers approval on construction projects.** I have included our standard drawing for manholes. We will keep your product on file for future reference.
