

PRECAST MANHOLE WITH INTERNAL SEAL

1. The rubber sleeve is available in heights of 8" (0-6), 10" (6-12), 14" (12-18), and 17" (18-24). The same expansion bands are used on all four seals with 3 bands being required on the 14" and 17" sleeves.
2. See the chimney height table below for seal needed to span from the frame to the top of the cone on manholes with various chimney heights. Frame offsets or diameter differentials will reduce these span heights.
3. The top of the cone shall have a minimum of 3" high vertical sealing surface that is smooth and free of any form offsets or excessive honeycomb.

CHIMNEY HEIGHT TABLE

| SEAL WIDTH | TO SPAN CHIMNEY HEIGHTS OF: |
|------------|-----------------------------|
| LSS 0-6 | 0 to 6" |
| LSS 6-12 | 6" to 12" |
| LSS 12-18 | 12" to 18" |
| LSS 18-24 | 18" to 24" |

For chimney heights greater than 24", extensions may be added. Consult your Cretex Specialty Products or your local Representative for recommendations.
